VOLUNTARY DISPOSAL

# IGLUS

Waste collection banks of classic design

## VOLUNTARY DISPOSAL

# IGLUS

Waste collection bank for voluntary sorted waste disposal. Low visual impact thanks to its low-key design. Basic characteristic: the useable capacity is the same as its nominal capacity to optimize the use of space.  
Product certified according to EN 13071-1:2008 standards.

### TECHNICAL FEATURES

#### Body and bottom material:

- 100% recyclable linear polyethylene, mass coloured and UV resistant

#### Manufacturing process:

- rotational moulding

#### Frame:

- polyethylene monocoque body without joints and welds, with differentiated thicknesses, upper side round-shaped to increase resistance
- steel internal handling structure, hooks and hinges
- polyethylene base — with two swing doors or cone-shaped— reinforced with steel braces
- all steel parts are hot-galvanized according to EN ISO 1461 standards

#### Insertion apertures, variants:

- two opposite apertures on inclined top
- 200x250 mm splinter-proof rubber rosettes
- hooded aperture with rubber protection
- 210x390 mm aluminium hinged gate with return spring
- 270x360 mm gate for large items, with lock

#### Opening of bottom, variants:

- two downward swinging doors hinged to the sides of the body and moved by rigid bars with asymmetric closing system for exact coupling of the splinter-proof bases
- cone-shaped bottom moved by rigid central bars anchored to the double-hook emptying system

#### Emptying:

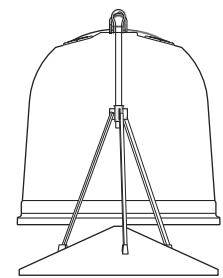

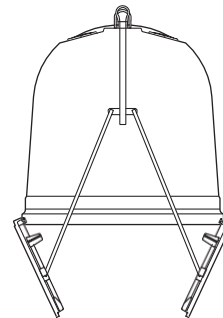

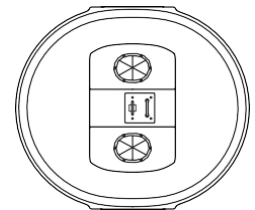

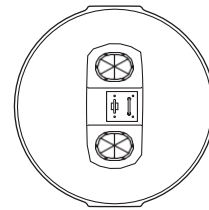

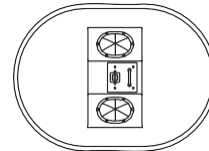

- by means of double-hook standard crane

#### Markings:

- decals with waste collection graphics and instructions

#### Standard colours:

- light blue, pastel yellow, pastel green, white, blue, yellow, green
- other colours on request for minimum quantities

#### Colours

Model	Bottom	Nominal capacity	Useful capacity	Width	Depth	Height with hook	Height without hook	Empty weight	Admissible weight
